Details

Application ID	6958079
Title	Social norms and honest behaviour across countries
Project	Social norms and honest behavioeur across countries
Project Description	<p>The purpose of the study is to see how culture, social norms, and contemporary institutions affect people's honesty. We are planning to run four treatments of the so-called dice game in various countries. In the dice game, subjects privately roll a dice and then report the outcome of the dice roll. After the main part of the experiment, there will be questions to elicit social norms and what people find acceptable behaviour. The implementation is particularly easy. It is a Qualtrics survey, run in classrooms, with students using their phones, and each session lasts approximately 45 minutes (mean completion time is 30 minutes). The project has received ethical approval from Spain (the originating country) and other countries it will be run in.</p>
Org Unit	Economics
Project Dates	1 Aug 2024 - 31 Jul 2025
Funder	3M (United Kingdom)
Is this a Student Project?	No
Applicant	Brit Grosskopf
Submitter	Brit Grosskopf

Visibility	People involved in this Application
Risk	<input checked="" type="checkbox"/> Medium
Ethics Liaison	FESE UEBS Ethics Committee
